

**Price Cap Plan for Cable and Wireless (West Indies)
Limited (C&W)**

I. Introduction

The purpose of this document is to set out the principles, commitments, parameters and formulae for the implementation of the price cap plan (“PCP”) that will be applied to Cable & Wireless Grenada Limited (“C&W”) from 1 December 2004 to 30 November 2008. The PCP has been agreed by C&W and the Eastern Caribbean Telecommunications Authority (“ECTEL”).

In this regard, this Grenada-specific PCP applies to certain of the regulated services provided by C&W, a company duly incorporated in Grenada and having its principal place of business at the Carenage, St. George’s, or its successor.

Consistent with the Grenada Telecommunications Act, 2000 (the “Act”), and unless otherwise noted in this document, the Grenada National Telecommunications Regulatory Commission (“NTRC”), or its successor, is generally responsible for the implementation of the PCP, subject to any required recommendation by ECTEL.

Unless otherwise noted, the terms and definitions applicable in the approved Telecommunications (Retail Tariff) Regulations, 2004 (“TR”) also apply in this document.

II. Coverage of PCP and PCP Baskets

The effective date of the PCP will be 1 December 2004.

The Price Cap Plan shall not be effective unless the following conditions are met:

- (a) final Telecommunications (Retail Tariff) Regulations, 2004 are enacted by October 8, 2004 and they are substantively identical to the draft Telecommunications (Retail Tariff) Regulations, 2004 specified in Schedule 1, or C&W has waived this requirement in writing and
- (b) the NTRC has approved, or is deemed to have approved, this Price Cap Plan for C&W, by October 19, 2004, or C&W has waived this requirement in writing.

The PCP will initially have three baskets:

- Basket 1: Residential fixed line access Services**
- Basket 2: Business fixed line access Services**
- Basket 3: Other National fixed line Services**

A fourth basket may be created to incorporate certain new Regulated Services introduced during the duration of the PCP:

Basket 4: New Services

Unless specifically noted, the PCP only includes Regulated Services; hence, unless specifically noted, the PCP does not include Unregulated Services. The rate elements in the PCP as of 1 December 2004 are identified in Appendix A.

Appendix A is intended to be a complete list of the Regulated Services provided as of 1 December 2004 by C&W. Similarly, Appendix B is intended to be a complete list of the Unregulated Services provided by C&W as of 1 December 2004. The objective is that Appendix A and Appendix B constitute the totality of the telecommunications services and rate elements, as defined by the Act, provided by C&W as of 1 December 2004.

C&W has attempted to comply with the objectives set out above. However, if, during the term of the PCP, the NTRC determines that C&W had been offering a rate element as of 1 December 2004 that was not specifically included in Appendix A or Appendix B, in its determination the NTRC shall be guided, *inter alia*, by the existing categorization in the PCP in determining how the rate element is treated. Specifically, the NTRC shall be guided by the 1 December 2004 categorization of rate elements into services when considering a rate element that was not specifically included in Appendix A or Appendix B and was offered by C&W as of 1 December 2004. Similarly if, during the term of the PCP, the NTRC determines that as of 1 December 2004 C&W had not been offering a rate element included in Appendix A or Appendix B, C&W will not be required to provide that rate element.

The aggregate level of actual prices for all service rate elements in any given service Basket, j, is subject to a price cap index (“PCI”). The Actual Price Index (“API”) is the revenue-weighted average level of aggregate prices implemented by C&W. The API and PCI for each basket, j, are initially set at 100 at the outset of the PCP.

Actual Price Index

The Actual Price Index for each Basket is calculated as follows:

(Equation #1)
$$API_{j,t} = API_{j,t-1} * (1 + API\ adjustment_{j,t})$$

where j = Basket

t = time

API adjustment_{j,t} = revenue-weighted average percent change in prices for all rate elements, k, for time t, in Basket j:

(Equation #2)

$$= \frac{\sum_{k,t} \left[Revenue_{k,t} * \left[\frac{Price_{k,t}}{Price_{k,t-1}} - 1 \right] \right]}{\sum_{k,y} Revenue_{k,t}}$$

where k is the relevant rate element,

$Revenue_{k,t}$ is the revenue accrued in Basket, j , for element k , in the following periods:

- 1 July 2003 through 30 June 2004 where t is between 1 December 2004 and 30 November 2005,
- 1 July 2004 through 30 June 2005 where t is between 1 December 2005 and 30 November 2006,
- 1 July 2005 through 30 June 2006 where t is between 1 December 2006 and 30 November 2007,
- 1 July 2006 through 30 June 2007 where t is between 1 December 2007 and 30 November 2008.

For the first Annual Compliance Filing, $Price_{k,t}$ is the proposed price for each element k , and $Price_{k,t-1}$ for each element k is the price in effect as of May 31, 2004.

For every subsequent price change under the plan, $Price_{k,t}$ is the proposed price for each element k , and $Price_{k,t-1}$ is the price for each element k in effect immediately preceding the effective date of the proposed price.

Price Cap Index

The Price Cap Index for each Basket is calculated as follows:

(Equation #3)

$$PCI_{j,y} = PCI_{j,y-1} * (1 + I_y - X_{j,y} +/- Z_y)$$

where j = Basket

y = Price Cap year for the following periods:

- 2005 $y = 1$ for the Price Cap year 1 December 2004 through 30 November
- 2006 $y = 2$ for the Price Cap year 1 December 2005 through 30 November
- 2007 $y = 3$ for the Price Cap year 1 December 2006 through 30 November
- 2008 $y = 4$ for the Price Cap year 1 December 2007 through 30 November

(Equation #4) $I_y = ((CPI_y / CPI_{y-1}) - 1),$

where the CPI_y is the Consumer Price Index for Grenada as published by the Eastern Caribbean Central Bank for year y in the following periods:

1 July 2003 to 30 June 2004 for $y=1$

1 July 2004 to 30 June 2005 for $y=2$

1 July 2005 to 30 June 2006 for $y=3$

1 July 2006 to 30 June 2007 for $y=4$

$X_{j,y}$ = Productivity offset for basket j in year y as set out below.

Z_y = Exogenous cost changes for year y as set out below.

Compliance Requirements

The API for each Basket must always be at or below the PCI for that Basket. That is, at all times:

(Equation #5) $API_j \leq PCI_j$

for each Basket j .

Price changes required to meet the Initial Rates and Pricing Commitments set out in Rule 1 below are not considered as price changes for the purpose the calculation of the API. That is, $Price_{k,t} / Price_{k,t-1} - 1 = 0$ for each stipulated rate reduction (i.e., for the corresponding rate element k , and year y) listed in Rule 1 below. Any price reductions that may be introduced for these same rate elements below Initial Rate and Pricing Commitment levels would, however, be treated as price reductions in the calculation of the API.

All services in Baskets 1 and 2 will be used in the calculation of each Basket's respective API_j for the duration of the PCP regardless of whether a service or rate element is designated as an Unregulated Service by the NTRC.

III. PCP Rules

Rule 1: Initial Rates & Pricing Commitments

C&W agrees to implement the following maximum prices (that is, C&W may set prices that are lower than these, but cannot set prices that are higher than these levels) for the following rate elements in Basket 3, during the following periods:

Service	Maximum Rate per	Effective Periods
---------	------------------	-------------------

	minute (EC\$)	
Fixed-To-Mobile: Day	\$0.760	1 December 2004 to 30 November 2005
Fixed-To-Mobile: Day	\$0.710	1 December 2005 to 30 November 2008
Fixed-To-Mobile: Night	\$0.750	1 December 2004 to 30 November 2005
Fixed-To-Mobile: Night	\$0.690	1 December 2005 to 30 November 2008
Fixed-To-Mobile: Weekend	\$0.750	1 December 2004 to 30 November 2005
Fixed-To-Mobile: Weekend	\$0.690	1 December 2005 to 30 November 2008
Fixed-To-Fixed: Day	\$0.070	1 December 2004 to 30 November 2008
Fixed-To-Fixed: Night	\$0.050	1 December 2004 to 30 November 2005
Fixed-To-Fixed: Night	\$0.040	1 December 2005 to 30 November 2008
Fixed-To-Fixed: Weekend	\$0.050	1 December 2004 to 30 November 2005
Fixed-To-Fixed: Weekend	\$0.040	1 December 2005 to 30 November 2008

Where: “Day” is defined as the periods from 6:00 a.m. to 7:59 p.m. Monday through Friday, or as otherwise agreed to by C&W and the NTRC.
“Night” is defined as the periods from 8:00 p.m. to 5:59 a.m. Monday through Friday, or as otherwise agreed to by C&W and the NTRC.
“Weekend” is defined as the period from 11:59 p.m. Friday to 11:59 p.m. Sunday, or as otherwise agreed to by C&W and the NTRC.

The Fixed-To-Fixed pricing commitments in this rule only apply to FTF service from a metered access line.

C&W also agrees to include a minimum of 60 minutes per month of free Fixed-To-Fixed calling on Night and Weekend calling periods with each metered Residential access line from 1 December 2004 to 30 November 2005. From 1 December 2005 to 30 November

2008 C&W will include a minimum of 80 minutes per month of free Fixed-To-Fixed calling on Night and Weekend calling periods with each metered Residential access line.

All pricing commitments pursuant to this rule will continue during the duration of the PCP regardless of whether the service or rate element is subsequently designated as an Unregulated Service by the NTRC.

Rule 2: Productivity Offset

The productivity offsets ($X_{j,y}$) are as follows:

Basket (j)	Year 1-4
1	I_y
2	0%
3	2.5%
4	Basket 4 not subject to productivity offset

The pricing commitments for Baskets 1 and 2 incorporated pursuant to this rule will continue during the duration of the PCP regardless of whether the service or rate element is subsequently designated as an Unregulated Service by the NTRC.

The rate elements in Baskets 1 and 2 will remain in those respective Baskets for the duration of the PCP regardless of whether a rate element in either basket is designated as an Unregulated Service by the NTRC.

Rule 3: Individual Service/Element Cap

For any service in the PCP, C&W may not increase an individual rate element more than $I_y + 7.5\%$ in any one year where the inflation factor I_y is the same as that defined in Equation #4 above. In addition, C&W may not increase the residential unmetered (unlimited) access line rate during the term of the PCP, and C&W may not increase the business unmetered (unlimited) access line rate more than I_y in any given year y during the term of the PCP.

Rule 4: Price Harmonization and Discontinuation Constraints

During the duration of the PCP C&W agrees to comply with the following price harmonization rules:

- A) **Residential:** The lowest monthly rate for a metered Residence access line must not be more than 25 percent less than the highest monthly rate for a metered Residence access line in any other Price Cap Country.

B) Business: The lowest monthly rate for a metered Business access line must not be more than 18 percent less than the highest monthly rate for a metered Business access line in any other Price Cap Country.

C) Fixed-to-Fixed (“FTF”): The lowest FTF Day/Evening/Night rate respectively must not be more than 35 percent less than the highest FTF Day/Evening/Night rate respectively in any other Price Cap Country.

D) Fixed-to-Mobile (“FTM”): The lowest FTM Day/Evening/Night rate respectively must not be more than 35 percent less than the highest FTM Day/Evening/Night rate respectively in any other Price Cap Country.

C&W shall require prior NTRC approval to discontinue the provision of any of the above services.

Rule 5: New Services

Based on the specific designation of new services as set out in the TR, the following sets out, where relevant, the corresponding PCP treatment. The assignment of a service or rate element to any Basket under this rule does not limit the ability of C&W to begin offering the new service immediately upon approval. The assignments under this rule are only for the purposes of calculating subsequent APIs.

New service that does not fall under 10(3)(b) of the TR

If this new service is determined to be a Regulated Service, the new service, including the corresponding rate elements and associated revenues, is assigned to Basket 3 on the first day of the month after the coming into effect of the corresponding NTRC decision or deemed acceptance pursuant to the TR.

New service that falls under 10(3)(b) of the TR

If this new service is determined to be a Regulated Service, the new service, including the corresponding rate elements and associated revenues, is assigned to Basket 4 on the first day of the month after the coming into effect of the corresponding NTRC decision or deemed acceptance pursuant to the TR.

Rule 6: Promotions

Market Trials and Short Term Promotions, as defined in the TR, are excluded from calculation of the API.

Rule 7: Exogenous Cost Factor

Exogenous costs are positive or negative cost changes that have been determined by the NTRC to satisfy all of the following criteria:

- a) Material in magnitude, so that any individual proposed cost adjustment must exceed an equivalent of 1.5 percent of C&W gross annual revenues from the provision of telecommunications services affected by the exogenous cost for the most recent continuous 12 months ending 30 June;
- b) Unique to the telecommunications sector;
- c) Outside of C&W's control, and
- d) Must not result from a transaction or transactions with a C&W affiliate.

An exogenous cost adjustment may be proposed by either C&W, the NTRC or ECTEL during the review of the Annual Compliance Filing, and will be considered on a case-by-case basis.

The financial effect of any proposed exogenous cost change must be quantified and explained in detail in the accompanying supporting documentation by the party proposing the adjustment. All documentation supporting proposed exogenous cost changes must include a proposed recovery mechanism including a rationale for the proposed recovery mechanism. The recovery of any exogenous cost changes should, to the extent possible, be recovered proportionally from the services affected by the exogenous cost change.

Rule 8: Compliance Filing

Subject to PCP design and Rules, C&W may propose increases or decreases in its rates for the Regulated Services at any time during the duration of the PCP based on the following procedure.

In any application for a price change during the PCP, other than a price change in Annual Compliance Filing, C&W must file a Rate Change Compliance Filing ("RCCF") with the NTRC. An RCCF must contain a description of the proposed rate changes, a recalculation of each Basket's API reflecting any proposed rate changes, and a demonstration that each new API_j is less than its respective PCI_j established during the most recent Annual Compliance Filing.

Supporting documentation for API calculations in an RCCF must include all service price elements by Basket, and the associated revenues established in the most recent Annual Compliance Filing. C&W must also provide documentation in an RCCF for pricing changes involving special treatment, including, but not limited to, the introduction of volume or contract term discounts.

An Annual Compliance Filing (“ACF”) will be made on 1 November of each year of the PCP calculating each new PCI_j for each Basket. The first ACF will be filed on 1 November 2004, with rates effective 1 December 2004.

The ACF will include all information required for the NTRC and ECTEL to replicate and verify C&W’s calculations, including an EXCEL (or similar electronic spreadsheet software) file that incorporates all regulated services, rate elements (existing and new) rates, and rate changes. If the ACF includes rate changes or new services, all filing requirements in an RCCF, including but not limited to, the calculation of any new APIs and the description and proposed rates for new services, must be included with the ACF.

Any proposed Exogenous Cost Changes, including all documentation as discussed in Rule 7, must be provided for in an ACF.

The ACF must include any annual financial reporting requirements as provided for in the Tariff Regulations. Further, price change notification must comply with the provisions in the Tariff Regulations.

Rule 9: Duration of PCP

The duration of the PCP is 4 years, from 1 December 2004 to 30 November 2008. The PCP will automatically renew for an additional 4 years (that is, through 30 November 2012) unless opposed by C&W, the NTRC, or ECTEL within 90 days of the expiry of the PCP. Any party opposed to the renewal of the PCP must give notice to every other party at least 90 days before the expiry of the PCP. Renewal of the PCP will not occur if any party opposes the renewal.

In the absence of renewal, extending the PCP to an optional fifth year (that is, 1 December 2008 to 30 November 2009) is at the sole discretion of the NTRC based on an ECTEL recommendation. To exercise such discretion the NTRC must issue a decision forty-five days before the expected expiry of the PCP (that is, by September 15, 2008).

Rule 10: Expiry of PCP

The PCP will expire on 30 November 2008 unless renewed for 4 years as described in Rule 9, or extended for an optional fifth year as described in Rule 9.

At the expiry of the PCP a new incentive-based regulatory plan may be implemented for C&W in accordance with the TR.

At the expiry of the PCP all subsequent rate changes will be subject to the new incentive-based regulatory plan that has been implemented or the Tariff Regulations in the event that a new incentive-based regulatory plan is not implemented.

IV. Appendix A of Schedule 2 - GRE

List of Services and Rate Elements included in the PCP as of 1 December 2004

Basket	Service(s)	Rate Element(s)
1	Residential fixed line access	1: Connection 2: Reconnection 3: Metered monthly rental 4: Unlimited monthly rental
2	Business fixed line access	5: Connection 6: Reconnection 7: Metered monthly rental 8: Unlimited monthly rental
2	Government fixed line access	9: Connection 10: Reconnection 11: Monthly rental
2	PBX fixed line access	12: Connection 13: Reconnection 14: Monthly rental
3	Fixed To Fixed Calling	15: FTF (Day) 16: FTF (Evening) 17: FTF (Night)
