SCHEDULE VII

Regulation 5 (1)

DIGITAL APPARATUS

PART I

INTERPRETATION

1. In this Schedule—

“Class A digital apparatus” means an apparatus that is marketed for use in a commercial, industrial or business environment, exclusive of an apparatus which is marketed for use by the general public or is intended to be used in the home.

“Class B digital apparatus” means an apparatus that is marketed for use in a residential environment notwithstanding use in commercial, business and industrial environments.

“Intentional radiator” means an apparatus that intentionally generates and emits radio frequency energy by radiation or induction.

“Unintentional radiator” means an apparatus or system that generates and uses timing signals or pulses at a rate in excess of 9,000 pulses (cycles) per second and uses digital techniques; inclusive of telephone equipment that uses digital techniques or any apparatus or system that generates and uses radio frequency energy for the purpose of performing data processing functions such as electronics computations, operations, transformations, recording, filing, sorting, storage, retrieval, or transfer.

PART II

ADDITIONAL TERMS, PROVISIONS AND LIMITATIONS

For all exempted equipment:

1. The exemption applies to the unintentional radiators for Class A and B digital apparatus as well as intentional radiators.

2009 *Telecommunications (Exemption) Regulations* SRO. 19

---

2. The level of radiation and conducted emissions limits should be for the Class B digital apparatus.

PART III

DESCRIPTIONS OF THE RELEVANT APPARATUS

- (e) cable TV home terminals.

**2. Intentional Radiators**

Intentional radiators must either have a permanently attached antenna or provide a unique coupler to prevent the use of unauthorized antennas and include:

- (a) cable-locating equipment;
- (b) cordless telephones;
- (c) remote control and alarms transmitters;
- (d) field-disturbance sensors for opening doors; and
- (e) spread-spectrum systems for wideband data transmission.
