

National Telecommunications Regulatory Commission (NTRC) Universal Service Fund (USF)

Projects Update and Request for Proposals

Universal Service Fund

The Fund was established for the promotion of Universal Service. According to the Telecommunications Act 2000, Universal Service includes the provision of:

- Public voice telephony;
- internet access;
- telecommunications services to schools, health institutions and similar institutions and the physically challenged; or
- other services by which people access efficient, affordable and modern telecommunications.

Objective of the Fund

As specified by the Act, the source of funding of the Universal Service Fund comes from Telecommunication Providers. The Universal Service Fund Office under the National Telecommunications Regulatory Commission (NTRC), is responsible for its management. The Fund supports the expansion of telecommunications services particularly to the underserved who currently do not have sufficient access and provides telecommunications services which are readily accessible and affordable. Support is provided for the introduction and expansion of telecommunications services to schools, health facilities and other organizations serving public needs as well as for the promotion of technological innovation in the telecommunications sector.

The Universal Service Fund has so far implemented the following projects with the aim of improved broadband connectivity, community Wi-Fi and computer equipment to enable adequate access and voice telephony through payphones:

1. Soufriere Community Access Centre and environs (project closure as of November 2018)
2. Digicel Payphones-increasing the existing fleet of payphones by fifteen (15) in underserved communities (project closure as of May 2019)
3. Babonneau Library and environs (project closure as of January 2020)
4. Ciceron Secondary School and environs (project closure as of March 2020)
5. The Libraries and Community Access Centres throughout St. Lucia (project closure as of December 2020)
6. Sir Arthur Lewis Community College -Southern Campus (project closure as of July 2020)
7. The Holy Family Children's Home-Ciceron
8. Improved service access for individuals who are differently abled in six (6) Institutions
9. Boys Training Centre and environs
10. National Skills Development Centre
11. COVID-19 Response- Students Lernbook/E-book and MiFi initiative
- 12. The Castries South East Communities Wi-Fi project**

Most recently the National Telecommunications Regulatory Commission through its Universal Service Fund completed **The Castries South East Communities Wi-Fi project**. This project targeted the following areas and their immediate surroundings; **Sarrot Multi-Purpose Court and Daycare, Cul De Sac Playing Field and Daycare, Belair Multipurpose Center, Morne Liberty Park, Bexon Sun Valley Park and Coolie Town Daycare Centre**. All projects are subsidized by the NTRC/ Universal Service Fund (USF), for a period of **five (5) years**.

The National Telecommunications Regulatory Commission, under its Universal Service mandate is requesting project proposals from any legal entity, group or person, in keeping with the stipulated requirements. All Project proposals are to be submitted on the approved application form which may be obtained from the office of the Commission or on the Commission's website at <https://www.ntreslu.lc/>. To submit Project Proposals and for further information, the Commission's Universal Service Fund Office can be contacted as listed below:
